

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of providing online presence information: maintaining, on one or more computers, a list of people that is known to a user; determining, at the one or more computers, that a person is known to the user based, at least in part, on one or more ~~communications actions performed by the user on one or more~~ messages received by the user from the person, the actions including one or more of (1) saving a message from the person; (2) printing a message from the person; (3) moving a message from the person from a first folder to a second folder; and (4) leaving a message from the person open for a predetermined period of time ~~between the person and the user~~;

in response to determining that the person is known to the user, adding the person to the maintained list;

accessing, at the one or more computers, the maintained list of people determined to be known to a user;

accessing, at the one or more computers, online presence information for the user;

determining, at the one or more computers, a potential receiver of the online presence information;

comparing, at the one or more computers, the potential receiver to the accessed list to determine if the potential receiver is included on the list; and

determining, at the one or more computers, whether to communicate the online presence information to the potential receiver based on whether the potential receiver is included in the list.

2. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining to not

communicate the online presence information to the potential receiver when the potential receiver is not included in the list.

3. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to communicate the online presence information to an instant messaging application of the potential receiver.

4. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to display the online presence information on a web page.

5. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to display the online presence information in member search results.

6. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to display the online presence information in a member profile.

7. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to communicate the online presence information to the potential receiver when a request for online presence information is received from the potential receiver.

8. (Original) The method of claim 1 wherein determining whether to communicate the online presence information to the potential receiver comprises determining whether to communicate the online presence information to the potential receiver absent a request from the potential receiver for the online presence information.

9. (Cancelled) ~~The method of claim 1 wherein determining that a person is known to the user based, at least in part, on an one or more communications between the person and the user includes:~~

~~" determining that the person is known to the user based on positive user actions related to e-mail communications from the person.~~

10. (Currently Amended) The method of claim 1 wherein the actions performed by the user on one or more messages received by the user from the person include saving an e-mail received from the person 9 wherein the positive actions include sending an e-mail to the person.

11. (Currently Amended) The method of claim [[9]]1 wherein the positive actions actions performed by the user on one or more messages received by the user from the person include replying to, forwarding, saving, or printing an e-mail received from the person.

12. (Currently Amended) The method of claim [[9]]1 wherein the positive actions actions performed by the user on one or more messages received by the user from the person include moving an e-mail from a first folder to a second folder.

13. (Original) The method of claim 12 wherein the first folder is an inbox folder and the second folder is a folder other than a delete folder or a spam folder.

14. (Currently Amended) The method of claim [[9]]1 wherein the positive action actions performed by the user on one or more messages received by the user from the person includes leaving an e-mail from the person open for a predetermined period of time.

15. (Cancelled) ~~The method of claim 1 wherein determining that a person is known to the user based, at least in part, on an one or more communications between the person and the user includes:~~

~~determining that a person is known to the user based, at least in part, on detecting a communication between the user and the person.~~

16. (Cancelled) ~~The method of claim 15 wherein the communication is an instant messaging communication.~~

17. (Currently Amended) The method of claim 1 wherein determining that a person is known to the user based, at least in part, on ~~an~~ one or more ~~communications~~ actions performed by the user on one or more messages received by the user from the person between the person and the user further comprising further comprises inferring that a person is known to the user, wherein inferring comprises:

accessing a contact list of the user to determine a first contact on the user's contact list;  
and

accessing a contact list of the first contact to determine a second contact on the first contact's contact list.

18. (Currently Amended) The method of claim 1 wherein determining that a person is known to the user based, at least in part, on ~~an~~ one or more ~~communications~~ actions performed by the user on one or more messages received by the user from the person between the person and the user includes detecting user actions that mitigate against factors that otherwise are used to determine a person is known to the user.

19. (Currently Amended) The method of claim 18 wherein the user actions comprise the user taking steps to ~~report~~ label a communication from the person as spam.

20. (Original) The method of claim 18 wherein the user actions comprise the user taking steps to add a person to a blacklist.

21. (Original) The method of claim 18 wherein the user actions comprise the user taking steps to move a communication from the person to either of a spam folder or a delete folder.

22. (Currently Amended) The method of claim 1 ~~determining that a person is known to the user based, at least in part, on one or more communications between the person and the user~~ further comprising:

enabling the user to expressly designate a person as known to the user; and  
adding the designated person to the list.

23. (Currently Amended) A computer-usable medium having a computer program embodied thereon for providing online presence information, the computer program comprising instructions for causing a computer to perform the following operations:

maintain a list of people that is known to a user;

determine that a person is known to the user based, at least in part, on one or more communications actions performed by the user on one or more messages received by the user from the person, the actions including one or more of (1) saving a message from the person; (2) printing a message from the person; (3) moving a message from the person from a first folder to a second folder; and (4) leaving a message from the person open for a predetermined period of time between the person and the user;

in response to determining that the person is known to the user, add the person to the maintained list

access the maintained list of people determined to be known to a user;

access online presence information for the user;

determine a potential receiver of the online presence information;

compare the potential receiver to the accessed list to determine if the potential receiver is included on the list; and

determine whether to communicate the online presence information to the potential receiver based on whether the potential receiver is included in the list.

24. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine to not communicate the

online presence information to the potential receiver when the potential receiver is not included in the list.

25. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to communicate the online presence information to an instant messaging application of the potential receiver.

26. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to display the online presence information on a web page.

27. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to display the online presence information in member search results.

28. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to display the online presence information in a member profile.

29. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to communicate the online presence information to the potential receiver when a request for online presence information is received from the potential receiver.

30. (Original) The medium of claim 23 wherein, to determine whether to communicate the online presence information to the potential receiver, the computer program further comprises instructions for causing the computer to determine whether to communicate the online presence information to the potential receiver absent a request from the potential receiver for the online presence information.

31. (Cancelled) ~~The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to:~~  
~~determine that the person is known to the user based on positive user actions related to e-mail communications from the person.~~

32. (Cancelled) ~~The medium of claim 31 wherein the positive actions include sending an e-mail to the person.~~

33. (Cancelled) ~~The medium of claim 31 wherein the positive actions include replying to, forwarding, saving, or printing an e-mail received from the person.~~

34. (Cancelled) ~~The medium of claim 31 wherein the positive actions include moving an e-mail from a first folder to a second folder.~~

35. (Currently Amended) The medium of claim ~~[[34]]~~23 wherein the first folder is an inbox folder and the second folder is a folder other than a delete folder or a spam folder.

36. (Cancelled) ~~The medium of claim 31 wherein the positive action includes leaving an e-mail from the person open for a predetermined period of time.~~

37. (Cancelled) ~~The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to:~~  
~~determining that a person is known to the user based, at least in part, on detecting a communication between the user and the person.~~

38. (Cancelled) ~~The medium of claim 37 wherein the communication is an instant messaging communication.~~

39. (Previously Presented) The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to determine that a person is known to the user further comprises instructions for causing the computer to:

access a contact list of the user to determine a first contact on the user's contact list; and

access a contact list of the first contact to determine a second contact on the first contact's contact list.

40. (Previously Presented) The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to determine that a person is known to the user based, at least in part, on detecting user actions that mitigate against factors that otherwise are used to determine a person is known to the user.

41. (Original) The medium of claim 40 wherein the user actions comprise the user taking steps to report a communication from the person as spam.

42. (Original) The medium of claim 40 wherein the user actions comprise the user taking steps to add a person to a blacklist.

43. (Original) The medium of claim 40 wherein the user actions comprise the user taking steps to move a communication from the person to either of a spam folder or a delete folder.

44. (Original) The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to:

enable the user to expressly designate a person as known to the user; and

add the designated person to the list.

45. (Currently Amended) An apparatus for providing online presence information:  
means for maintaining a list of people that is known to a user;  
means for determining that a person is known to the user based, at least in part, on one or more ~~communications actions performed by the user on one or more messages received by the user from the person, the actions including one or more of (1) saving a message from the person; (2) printing a message from the person; (3) moving a message from the person from a first folder to a second folder; and (4) leaving a message from the person open for a predetermined period of time between the person and the user;~~  
means for in response to determining that the person is known to the user, adding the person to the maintained list;  
means for accessing the maintained list of people known to a user;  
means for accessing online presence information for the user;  
means for determining a potential receiver of the online presence information;  
means for comparing the potential receiver to the maintained list to determine if the potential receiver is included on the list; and  
means for determining whether to communicate the online presence information to the potential receiver based on whether the potential receiver is included in the list.

46. (Cancelled) ~~The method of claim 1 further comprising:  
inferring that a person is known to the user; and  
adding the inferred person to the list.~~

47. (Previously Presented) The method of claim 1 further comprising:  
determining that a person is known to the user by accessing a contact list of the user.

48. (Cancelled) ~~The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to:  
infer that a person is known to the user; and  
add the inferred person to the list.~~

49. (Previously Presented) The medium of claim 23 wherein the computer program further comprises instructions for causing the computer to:

determine that a person is known to the user by accessing a contact list of the user.
